Shipping Price Guide

Below you will find a basic shipping guide with average shipping costs based on the size of your order. These are just averages calculated on thousands of orders placed and depending on the size of the frame and the size of the order along with your location, your shipping cost will vary from the chart.

Poster frames require larger packaging and sometimes get thrown into an oversize category, which adds to the cost. Overall, orders of one, two, or three frames may cost the same because of the packaging. Adding a frame or two to your order saves on shipping.

With larger orders we can skid the order for shipment on a common carrier like Roadway or Conway Express for greater cost efficiency.

For exact shipping, enter your selections in the cart, enter your address and zip code and then review your shipping options and prices.

No purchase is necessary to access your final total. We check shipping charges for each order to insure the accuracy of our calculator and refund overcharges greater than \$5.00
